

Glenn H. Norton

Excellence in Dentistry... a new smile, a new you. D.M.D.

Fall 2005

Note from Dr. Norton

This is the time of the year when I always find myself thinking about our friends and patients, both new and old, who we've gotten to know better throughout the past year. It certainly has been a wonderful year, and on behalf of myself and my staff, I want to send a heartfelt thanks to all of you and best wishes for a happy holiday season.

In an effort to share information, I will on occasion be sending you a snapshot of some of our exciting patient cases. Enclosed in this newsletter is an article that was recently featured in *Evansville Living* highlighting Kalah

Georgette-Jerstad, one of my most recent cosmetic dental cases. You can see from the photographs the dramatic change we have made not only in her smile, but also her life. Thank you for allowing me to share this transformation with you.

“It is so rewarding for our entire office to care for all of our patients’ smiles.”

It is so rewarding for our entire office to care for our patients’ smiles.

Thank you for your continued support – we look forward to a happy and healthy year to come!

-Dr. Norton and Staff

Zoom! 2

Dr. Norton is excited to introduce ZOOM! 2 – the latest version of teeth whitening technology. ZOOM! 2 is the popular product used in all of the hottest makeover television shows, including ABC's *Extreme Makeover*. The advances in ZOOM! 2 provide faster results and fewer sensitivity issues, ultimately making the whitening process more comfortable for the patient.

The ZOOM! holiday special we offered last year was so popular that we have decided to honor it again this year. For more details on this special incentive, or if you are thinking of whitening your teeth and have questions about ZOOM! 2, please give Dr. Norton's office a call at 812-479-0229. We will be glad to tell you more about the product or send complete information to you in the mail.

Whirrrrr!

Dental patients often complain about the loud, high-pitched “whirring” sound of the high speed hand piece necessary to prepare a tooth for a crown or filling. Because of recent advances in technology, Dr. Norton is pleased to announce his office equipment has been updated with a new electric version that is extremely quiet, more efficient, and much more comfortable for the patient. Of course, our hope is you will not need to experience this new acquisition – but if you do, we are sure you will appreciate this very quiet new addition to our office equipment.

Wedding Bells

Dr. Norton is proud to report that his youngest son Brett recently married Michelle in New Jersey on November 6, 2005. Dr. Norton and Christy were able to fly up for the recent nuptials. Brett and Michelle currently reside in Washington, D.C., where Michelle works for Senator Lautenberg (NJ –

Dem). Brett works for the American Red Cross in their Information Technology Division, and he recently spent time in Houston teaching computer technology through the Red Cross relief effort following Hurricane Katrina.

Our hearts go out to all of you who were affected by the recent tornado.
